

# Materials

## ARCO 600™

Vinyl-coated 600-denier polyester duck. Durable, water-resistant and abrasion-resistant. May be imprinted or embroidered.

## ARCODUCK™ II

Outer layer of vinyl-coated 600-denier polyester duck bonded to a polyester fabric with a moisture proof inner liner. Adds to the abrasion resistance and water resistance of Arco 600. May be imprinted or embroidered.

## CORDURA® PLUS

The look and feel of cotton duck with the superior performance of nylon. High abrasion resistance. Urethane coating. May be imprinted or embroidered.

## LEATHERETTE

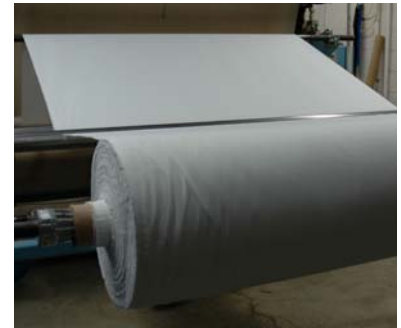

Vinyl coating applied to fabric base. Easily cleaned with soap and water. Silk screen imprinting only.

## NYLON

200-denier fabric with water-resistant urethane coating. Silk-screen imprinting only.

## NYLOTOP® 2000

A Rifkin fabric development. Layers of 70 denier vinyl-coated Nylon and polyester fabric bonded together with a moisture proof inner liner. Wear-resistant. An exceptionally strong material with a smooth finish. May be imprinted or embroidered.

# Specialty Materials

## 3-PLY V-CLOTH

This heavy-weight, heavy-duty industrial fabric is a lamination of vinyl-nylon-vinyl. Resists abrasion and weathering. Suitable for the most demanding applications. May be imprinted or embroidered.

## 10 OZ. DUCK

A sturdy 10 oz. single-filled cotton duck available in unbleached natural color only. Silk-screen imprinting only.

## .016 CLEAR VINYL

A sturdy "see-through" vinyl fabric, ideal for those applications where it is important to be able to visually inspect contents at all times.
